# FACT SHEET

#### Not all services maybe provided at your location

#### Screening (Teeth Checkup)

A dental care professional will look in the mouth to check for changes in teeth that may indicate cavities or other oral health problems.

Risk(s): Decay or other problems could exist and get worse if not discovered.

Alternative(s): No checkup.

### Fluoride Coating

A temporary thin coating (also called varnish) put on the teeth to help protect from cavities. The coating is safe even if it is swallowed. It does not hurt or stain the teeth

Risk(s): Allergy is not common.

Alternative(s): Daily or weekly fluoride rinses, fluoride foam, or fluoride gels applied at your dentist's office.

### Sealant

A dental sealant is a white coating put on the chewing surfaces of back teeth where cavities occur most often. Sealants make barriers on teeth that keep bacteria out and prevent cavities. They do not interfere with biting or chewing. Risk(s): Sealants only protect the chewing surfaces. They can last for several years, but sometimes need to be replaced.

Alternative(s): Silver Fluoride. No sealants. Choosing not to use sealants could increase the chances you will develop decay in the chewing surfaces of the teeth.

**Before Sealants** 

After Sealants

#### Silver Fluoride

Fluoride with silver looks like water. It is painted on the teeth with a tiny brush and can heal early tooth decay. It goes on guickly, and does not hurt. If there are cavities in the mouth. silver fluoride can stop them from growing, and sometimes even heal them. Cavities that are stopped or healed with Silver Fluoride will turn dark brown or black. Teeth without cavities will not change color. If the color shows a lot, a dental professional can cover it with white filling material. Fillings may not be needed for cavities that are healed with Silver Fluoride.

**Risk(s):** If Silver Fluoride comes in contact with skin it will cause a small dark spot that will go away on its own in 1-2 weeks. If it comes into contact with existing white fillings it might stain.

Alternative(s): No Silver Fluoride applied. This could leave harmful bacteria on your teeth and increase the chance of tooth decay. Use fluoride toothpaste regularly and have fluoride varnish and sealants applied at your dental office.

#### How Silver Fluoride looks on a tooth with a cavity

How Silver Fluoride looks on a tooth with no cavity

After

## **Antiseptic For The Teeth** (lodine)

The antiseptic kills bacteria that cause cavities. When applied before the fluoride coating, it prevents many more cavities than the fluoride coating alone. Iodine is a normal part of our diet from food and is safe. It does not hurt or stain the teeth. Risk(s): Allergic reactions are not common, but you should not have this treatment if you are allergic to shellfish.

Alternative(s): No iodine applied. This could leave harmful bacteria on your teeth and increase the chance of tooth decay.

#### **Protective Restoration**

This is a simple tooth colored filling placed in a cavity to protect the tooth until a permanent filling can be done. It relieves pain and helps healing inside of the tooth. No shots are needed. It does not hurt.

**Risk(s):** Protective fillings may partially fall out, but what is left still protects the tooth.

Alternative(s): A regular filling or cap. Without care, the cavity may get bigger or become painful.

# **Race & Ethnicity Information Form**

Beginning in 2010, new federal regulations require that all U.S. schools gather statistical data on students' race and ethnicity using new categories. In order for the data to best reflect the identities of our communities, it is important that parents and guardians be thoughtful about their families' ethnic and racial identity when choosing the appropriate categories for their children. Both questions below *must* be answered to complete all student records.

Please complete one form for each of your students, answering both Question #1 and #2, and return the form(s) to the school office. Thank you.

## Pendleton School District – Electronic Communications System Agreement

Your student needs your permission to use the district's electronic communications system. Your student will be able to communicate with other schools, colleges, organizations and individuals around the world through the Internet and other electronic information systems/networks.

With this educational opportunity also comes responsibility. Inappropriate system use may result in discipline, up to and including expulsion from school, suspension or revocation of your student's access to the district's electronic communications system, and/or referral to law enforcement officials.

Although the district is committed to practices that ensure the safety and welfare of system users, including the use of technology protection measures such as Internet filtering, please be aware that there may still be material or communications on the Internet that district staff, parents and students may find objectionable. While the district neither encourages nor condones access to such material, it is not possible for us to eliminate that access completely.

Attached to this letter is an agreement for your student and you to read and sign stating agreement to follow the district's electronic communications system policy and administrative regulation. The district's policy IIBGA – Electronic Communications System and administrative regulation are accessible from the district's website or upon request and include provisions on, but are not limited to, student use under General Use Prohibitions and Guidelines/Etiquette and student-related rules under Violations and Consequences.

Please review the district's Electronic Communications policy and administrative regulation, and the provision therein, carefully with your student and return the attached agreement form to the school office indicating your permission for your student to use the district's electronic communications system.
